My opinion after talking to Harry was he just didn't understand the process, I think he is good now and I will make sure to continue to communicate that process.

Thanks,

Brad Morgan

There are two customers with these tables

R6 has a template that we use to deliver data to the Regional EU for their purposes. Once the Regional EU approves the data we generate the tables in the HQ format for submission to HQ.

Make sense?

We were expecting a table to share with you all for 8/13 and 14. We had validated data tables we worked with today but we were expecting a table in a format suitable for presentation.

This part made me nervous. We need to make sure Region 9 understands the table has been deemed suitable for presentation by HQ.

The data flow we are working out with the approved data requires we get the same EDD back that we started with.

Thanks Eric. Public site looks good with the viewer. Thanks for that.

We were expecting a table to share with you all for 8/13 and 14. We had validated data tables we worked with today but we were expecting a table in a format suitable for presentation.

We did not see this so we're very confused about what our role is and what our

expectations should be. Any idea where we might have gone wrong?

At this stage the release of this data is the highest Regional priority.

Let me know our thoughts.

Harry

Harry,

The DATA team is working a process to track when data is submitted to HQ EOC for review then ultimately posted to the .gov site.

This process will help us update the public geospatial viewer that is currently embedded in the EPA.gov Gold King Mine site.

Thanks

Harry,

Eric was asking who from your team is submitting these to the HQ EOC for review?

Ok - that's good news and what I was most concerned about. I'll be patient for the 8/13 table.

Thanks for the update

That is suppose to happen in the Region 9 ICP, I don't understand what is taking them so long. If need be we can see what resources are available to assist your ICP for this project.

8/12 surface water samples were sent to Terry this afternoon to be posted.

Hi all.

Any sense of when our 8/13 tables will be provided? What about 8/12? We are frustrated that we haven't seen these because of

extremely high priority on their release to the Navajo Nation. Any insight you can offer is appreciated.

Thank you.

The 8/13 data is with the table formatting person. The 8/14 data had some questions come up and went back to the validator. I should be seeing that data before cob.

Thanks,

Patty

I'm looking for validated 8/14 data from San Juan River sampling – do you know if available, and if so where?

Thanks, Gerry
